

geldburg

“Investment is most successful when it is most businesslike.”

We work hard to earn money and fulfill our dreams of buying a home, starting a business, going for a vacation, or for any unforeseen events. But just working hard may not be sufficient to lead a comfortable lifestyle or to fulfill your dreams and goals. Investments give money the right direction and much higher returns as compared to saving it in a bank account.

We empower individuals to take control of their financial futures, providing them with the tools and resources they need to succeed.

We Envision

a future where financial transactions are borderless, instantaneous, and free from the constraints of traditional banking systems. Through continuous innovation and collaboration with our community, we strive to make this vision a reality, driving positive change and ushering in a new era of financial sovereignty.

About Us

Geldburg token is a blockchain-secured membership that grants access to its community, that monetizes community membership. The price of the token increases with every sale and purchase with the mathematical logic and system of Geldburg

One of the benefits of the Geldburg token is that your membership in its community becomes a sort of asset. You can resell the token more than you paid for it. This makes it feel like an investment instead of just an expense.

BUSINESS PLAN

Distribution Calculation of the Goldberg Token

FOR BUYERS
